P'=(⁻b, a), the image of P under R_{90}.
$\left(1, \frac{a}{-b}\right) = \left(1, \frac{-a}{b}\right)$
ℓ
$y = \frac{-a}{b} \cdot x$
$\left(1, \frac{b}{a}\right)$
P=(a,b)
$y = \frac{b}{a} \cdot x$
