$y = x^2$
$S(x, y) = (1.5 \cdot x, 3.2 \cdot y)$
$y = 3.2 \cdot \left( \frac{1}{1.5} \cdot x \right)^2$
$T(x, y) = (x + 2, y + 1)$
$(y + 1) = 3.2 \cdot \left( \frac{1}{1.5} \cdot (x + 2) \right)^2$
