$$x^2 + \underbrace{\frac{b}{a}}_{B} \cdot x + \underbrace{\frac{b^2}{4 \cdot a^2}}_{C} = \underbrace{\frac{-c}{a} + \frac{b^2}{4 \cdot a^2}}_{D}$$

$$\left(x + \underbrace{\frac{1}{2} \cdot \frac{b}{a}}_{A}\right)^2 = \frac{-4 \cdot a \cdot c + b^2}{4 \cdot a^2}$$
